MUNICIPAL BATHING AREA "FRAJDA" IN NYSA

Built on the site of an old German swimming pool, the modern "Frajda" swimming pool complex has been operating since 2018. There are six pool basins at the edge of the open-air pool. There are two recreational pools with water jets, massage jets, and waterfalls, as well as a swimming pool and a children's paddling pool with a fountain. The biggest attraction is a tower with three slides, including the longest in the region, a 150-meter pontoon slide and a 120-meter rafting slide. Terraces with loungers are built around the complex, along with a sandy beach and green spaces for blissful relaxation.
